

CS-M FPS TACTICS DC

INTRODUCTION

The CS-M FPS Tactics Pad is developed specifically for optical gaming grade sensors, but works equally well for high-end laser sensors. The graphical theme will put a smile on the faces of all First Person Shooter-fans, with its depictions of familiar in-game situations. Excellent tracking and speedy glide, coupled with an aggressive non-slip 100% natural rubber base, making thorough contact with your desktop, ensures that your gaming surface stays firmly in place and performs at the highest level.
